

## **Arcadia Solutions Announces New Clients**

**BOSTON – March 1, 2010** – Arcadia Solutions, a national healthcare IT consulting company, has shown a strong start to Fiscal 2010 to date, naming four new marquee clients to its roster in the first quarter.

The newly acquired clients include a nationally renowned children's hospital in New England, a large community health center network in the Midwest, an integrated health system serving the Boston area and a pediatric physicians association.

These important clients are joining Arcadia's already expanding roster of partners from across the country as IT solutions become an increasingly integral part of healthcare reform.

Arcadia will work with its new clients to help them optimize their e-health initiatives like EHR implementations and develop new strategies that harness the abilities of cutting-edge IT solutions to improve their businesses.

The demand for the strategic, data-driven IT solutions that Arcadia provides is rising as healthcare providers and insurance plans look to information technology as a primary means to drive their business value through increasing the quality of care while reducing costs.

### **About Arcadia Solutions**

Arcadia Solutions is a national consultancy founded in 2002 outside of Boston. Arcadia focuses on driving business value through strategic, data-driven IT solutions in the provider and insurance plan sectors of the healthcare industry and the Fortune 500.
